2012

ANNUAL REPORT

Meat Board of Namibia

Since 1935

CONTENTS

CHAIRPERSON'S REPORT – 2012/2013

The vision of the Meat Board of Namibia (MBN) is to be a locally and internationally recognised organisation that promotes a profitable, vibrant, quality-driven and disease-free Namibian meat industry, while the Mission of the Meat Board is to promote a conducive environment for sustainable livestock production, market growth and diversification for livestock, meat and meat products; and to maintain standards and quality assurance by way of appropriate regulatory intervention.

The year 2012 will be remembered as a year that was characterised by continued volatility and uncertainty in the global and national economic environment. With the current population growth in the world, there has been increasing pressure on governments and agricultural producers to:

- Produce food (proteins) for the population of the world;
- Manage competition for land and food;
- Control the increase in production costs in the agricultural sector.

Namibia's meat industry has the potential and ability to increase meat production to the benefit of the economy, the country and the food supply in the world:

- Namibia has dedicated and extremely competent meat producers who are willing to make a substantial contribution to the economy of the country;
- Namibia has the ability to provide in the majority of its national meat needs;
- Namibia has an animal health status (south of the veterinary cordon fence) that satisfies the international community.
- Namibia has high standard export abattoirs that answer to the standards of the veterinary authorities of South Africa and the European Union.

During the year under review the Meat Board identified the following challenges to create a conducive environment:

- Finality regarding the proposed sheep export levy, rations and the local slaughtering of sheep;
- Promotion of local slaughtering at beef export abattoirs and, to limit weaner exports;
- Abolishment of the 15% export levy on pickled sheep skins to allow for a better carcass price to local producers;
- Systems to make the export of chilled beef under the current Foot-and-Mouth Disease status from the Caprivi possible;
- Mentoring of producers north of the veterinary cordon fence (VCF) to optimise abattoir slaughter capacity;
- Finalising access to the USA, China and other profitable markets.

The following initiatives are presented to highlight some of the activities of the Meat Board.

Meat Market Access, Maintenance and Diversification

European Union (EU) market access

The European Commission adopted a temporary Market Access Regulation 1528 which granted duty-free and quota-free market access to Namibia and other ACP states until October 2014. The MBN continued to present inputs, based on independent studies completed by the MBN the past years, stating the importance of continued negotiations to sign the Economic Partnership Agreement (EPA) with the European Union. The economic benefit of signing the EPA and the current limited alternative markets for Namibian meat products, as well the consequences for the Namibian meat industry due to the possible loss of the EU market were specifically sighted.

Norwegian quota

The MBN was requested by Cabinet to issue beef export permits to qualifying export abattoirs exporting beef to Norway on an equal basis. Namibia and Botswana share a GSP beef quota of 2 700 tonnes and an EFTA quota of 500 tonnes which was made available by the Norwegian Parliament to Namibia.

Due to Botswana not utilising its full quota during 2012 she transferred 980 tonnes of its GSP quota and in addition, its full share of the 250 tonnes EFTA quota to Namibia.

Qualifying Namibian meat exporters were awarded beef export permits for 2 828 tonnes of chilled and frozen beef to Norway. Administratively, the process worked well with good cooperation provided by all stakeholders involved.

Caprivi beef exports

A grant agreement between the Millennium Challenge Account (MCA) and the MBN to develop meat hygiene systems to improve beef exports from the Caprivi was signed in November 2012. Subsequently agreements were signed by third parties on producer training, an approach to a Foot-and-Mouth Disease epidemiological study and training of the Central Veterinary Laboratory staff of the Directorate Veterinary Services. The MBN further assisted the Wildlife Conservation Society (WCS) and USAID in conducting socio-economic analyses for Commodity-based Trade (CBT) and other scenarios for beef exports from the Caprivi. Preliminary results indicated that CBT and CBT with further processing are the most viable options to increase beef exports from the Caprivi and that beef produced under these regimes do not pose any health risk to an importing country. Under this program the MBN translated the Foot and Mouth Disease DVD "The beauty and the beef" into Silozi and which was distributed to local Caprivi producers and other stakeholders via the mentors of the LPF Farmers Mentorship programme.

Market diversification

Phase I of a Marketing Diversification Study was conducted to identify markets through researching, evaluating and costing possible market opportunities for Namibian meat and meat products outside the European Union, Norway and South Africa that would render equal or better returns than currently realised in these main markets for Namibia.

The study employed two models, namely the "Extended Gravity Model" and the "Decision Support Model" which identified 12 realistic export opportunities. A total of 149 countries were analysed during the filtering process. After identifying the export destinations with the highest potential, their financial attractiveness were calculated as the most favourable for beef fresh/chilled and frozen cuts. The 12 countries with the highest export prospects identified are: Hong Kong, Singapore, the United States, Switzerland, Canada, Bahrain, Malaysia, Kuwait, Saudi Arabia, China, Mexico and Qatar. Special emphasis was placed on markets for beef from the Northern Communal Areas which do not require a strict FMD-free status for meat imports.

The study will be extended to phase II which will comprise of a more in-depth market analysis and supply strategy for five selected lucrative export opportunities.

Applying Regulatory Systems

Cattle registration and traceability - NamLITS

With the implementation of the Namibian Livestock Identification and Traceability System (NamLITS) in November 2011, producers are required to register their cattle before movement permits will be issued. The MBN granted an amount of N$1.5m for the financing and support of the NamLITS data base, which is a necessity for retaining Namibia's export markets. The responsibility and integrity of NamLITS is that of the Directorate of Veterinary Services (DVS), while the MBN provided technical support as far as hard- and software are concerned. A substantial portion of this amount has been utilised to establish NamLITS II north of the Veterinary Cordon Fence.

Quality of ear tags

The MBN due to allegations of high ear tag losses, decided to conduct a survey among producers. The survey found that the ratio of lost ear tags was <2%, which is in line with the international norm. Subsequent to the survey, the MBN submitted ear tags to the South African Bureau of Standards for testing tensile load strengths. The SABS confirmed that the tags of the current supplier complied with international specifications.

Farm Assured Namibian Meat Scheme (FAN Meat)

FFAN Meat standards are set and administered by the MBN in close co-operation with DVS, export abattoirs and the country's livestock producers. The success of the FAN Meat standards – in terms of the minimum quality of the products guaranteed and their adherence to export criteria – mean that Namibia is able to comply with the private standards demanded by leading supermarket chains in South Africa. These chains place a premium on the Namibian meat products meeting FAN Meat standards for their respective brands, Free Range and Country Reared.

To internationally accredited FAN Meat, the MBN approved a process over 12 months to subscribe the FAN

Meat Scheme to ISO 9001 standards. The FAN Meat Scheme and its support structures (human resources, logistics and documentation) will be audited by an international accreditation body and certified ISO 9001 compliance in the course of the next financial year.

Market Share Promotion Scheme for pork

Due to pork producers worldwide being under economic pressure because of increasing feed costs and decreasing pork consumption, the pork sector of Namibia is no exception. The sector requested the MBN to introduce regulatory measures to protect the primary production sector without disadvantaging the secondary sector and the consumer. The scheme comprises that the Meat Board will only issue an import permit if 25% of the quantity of pork required has been acquired locally. Upon recommendation of the producers and the processors, the scheme was endorsed by the Meat Board for implementation, 1 October 2012 and was received well by all stakeholders.

Sheep Marketing Scheme and Exports

An independent audit and forensic company, Afri-Compliance, audited the MBN's implementation of the Sheep Marketing Scheme to verify its compliance with the terms set by Cabinet, the Meat Industry Act and the MBN. The MBN administration of the scheme showed no deviations from the requirements and therefor achieved a platinum award in this regard.

Production, animal health and marketing

Farmers' Mentorship program

The MBN through levies received from producers south of the Veterinary Cordon Fence, launched the Livestock Producer Forum (LPF) Farmers Mentorship Program nearly three years ago to promote improved cattle off-take in the NCA. To advance these efforts, farmers' manuals on cattle management were developed for use by producers. These handbooks were intended to assist farmers in identifying infectious cattle diseases, internal and external parasites and deficiencies of minerals that are prevalent in the NCA. The Finnish Embassy assisted with funding the printing of 5 000 copies of the manuals in five indigenous languages – Otjiheroro, Oshikwanyama, Oshidonga, Rukwangali and Silozi.

Animal welfare

Animal welfare aspects have been incorporated in the FAN Meat standards, which were extended 'from farm to fork', meaning better handling during transport, humane slaughter as well as during rearing, amongst others. The focus on welfare enabled the meat industry to provide 'value added' products for the export markets with absence of cruelty as a selling point. The MBN also facilitated training on Animal Welfare to export abattoir operators. The challenge in future will be to train and expose the livestock transporters to Animal Welfare requirements while an Animal Welfare Strategy drafted by the MBN for discussion with the various stakeholders is on-going.

Benchmark Namibia's livestock producers

During the year, the MBN enrolled with Agri-Benchmark, an international network of producers comparing value chain statistics amongst each other. Data will be collected annually from study groups using the Agri-Benchmark model and methodology and this will enable Namibia to have access to data from all participating countries in order to do an international competitiveness of the Namibian production circumstances.

Improving the quality of butcheries - Seal of Quality

The MBN has launched a voluntary Seal of Quality certification programme to guarantee customers safe and wholesome red meat and red meat products at local butcheries and retail outlets. The programme is aimed at strengthening consumer trust in the hygiene and quality of locally produced and sold beef, lamb and pork. Slaughtering facilities from where the meat are sourced will be audited annually according to the MBN checklist of food safety and hygiene requirements with participating butcheries/abattoirs requiring to score at least 80% in order to receive certification.

Goat marketing

The MBN's Market Diversification study revealed some potential markets for Namibian goat meat. However, these markets are not competitive when compared to the existing goat market in KwaZulu-Natal, South Africa.

Strengthening Stakeholder Relations

Joint Vision for the Meat Industry

The Meat Board has been closely involved with the compilation of a joint vision for the Namibian meat industry. It is of utmost importance to bring about a focused economic growth goal for the total industry and not for individual organisations or sectors only. The joint vision was compiled in cooperation with, among others, Ministerial and State Owned Enterprise staff, farmers' unions, abattoirs, processors, agents, hide and skin processors and feed companies, and was drafted at a workshop during August 2012. All the role players committed themselves in achieving the Joint Vision and discussions will continue during 2013.

Dare to Care Emergency Fund

The Dare to Care Emergency Fund was established in 2000 to assist fellow Namibians from the farming community in case of disasters such as fires and floods. The MBN forms part of a group of agricultural organisations that contribute on an ad hoc basis to the affected victims. Food aid was given to the San Community during the past year in an effort to alleviate their food shortage during the drought.

World Meat Congress

The MBN attended the World Meat Congress of the International Meat Secretariat in Paris, France during June 2012. Aspects of special interest for the Namibian meat industry included the worldwide demand for protein in the future, which will create opportunities for Namibia to produce and export more meat, the increased importance of animal welfare and sustainable production demanded by consumers and the fact that world prices for beef are narrowing between traditional low-cost and high-cost meat producing countries, which prove that meat, in order to earn higher prices, will have to differentiate and carry a brand, and thus not remain a commodity.

Exhibition at IFMA Food Fair, South Africa

The Meat Board in conjunction with industry participants (Meatco, Hartlief and Brukkaros) exhibited Namibia's meat and meat products at the International Trade Fair for the Meat Industry of Africa (IFMA) in Johannesburg, South Africa during July 2012.

Botswana visits Meat Board

A delegation comprising government officials of the Botswana Ministry of Agriculture and the Botswana Meat Commission (BMC) visited the MBN to share information on cattle identification and traceability, ear tags and general aspects of the Namibian meat industry.

Maintaining a Sustainable Organisation

Co-operation between the Meat Board and Agronomy Board

The Meat Board and the Namibia Agronomy Board concluded an agreement of co-operation on 1 August 2012. The aim of the agreement was to achieve more efficiency between the two organisations at the same cost by identifying and sharing synergies between the two organizations. The agreement included cooperation with regard to identified synergies which are financial administration, management of information technology and human resources management. At the end of the financial year both organizations were satisfied with the arrangement and concluded to make it a long term agreement?

Amendments to Levy percentages

The Ministry of Agriculture, Water and Forestry endorsed the MBN's recommendation to adjust the MBN's levy percentages downwards from 0,8% to 0,6% on livestock exported and slaughtered locally, and 0,8% to 0,5% on livestock traded domestically to assist livestock producers during the drought. The downwards amendments to the levy percentages were implemented on 1 February 2012. The Meat Board, however, forecasted that the lower levy income neither would be sufficient to cover the MBN's expenses during the next financial year, nor would be ensure sustainable for the organisation in future.

Statutory Compliance

The Governance and Performance Agreements with Board members and Management were finalised during the year under review and would be presented to the Minister of Agriculture, Water and Forestry for signing early the next financial year.

The following policies and compulsory documents s were developed and or updated in line with the State Owned Enterprises Governance Act requirements:

- Financial Policy and Investment Policy;
- Meat Board Business Plan and Strategic Plan;
- Business Continuity and Disaster Recovery Plan;
- Code of Business Conduct as well as Charters for the Board and Board Committees.

Acknowledgement

For the first time since its inception, the Meat Board held a quarterly board meeting at Katima Mulilo, Caprivi, in August 2012, in order to give board members exposure regarding the unique marketing environment of livestock and meat in the region. Since movement controls have been instated, the Caprivi has been closed for beef exports for six months of 2012. Visits to the abattoir at Ngwezi and the Katima quarantine camp have been conducted and the exposure was concluded with a discussion workshop between cattle producers and board members regarding the LPF NCA Farmers Mentorship Program in the region. At the workshop, producers expressed their gratitude to the Meat Board for the value the Mentorship Program renders in their different farming environments.

The continued development of board members' and employees' knowledge, skills and abilities formed a vital part of the MBN's strategic plan. Although it was not possible to finalise all the targets identified at the beginning of the year for the year under review, it is gratifying to know that the MBN could continue to count on the support and relationships built over the past years.

In conclusion, a special word of thanks to the board and staff for their valued support in guiding the MBN through the reporting period is expressed.

CHAIRMAN

MEAT BOARD OF NAMIBIA

MEAT INDUSTRY PERFORMANCE IN 2011

Beef Sector

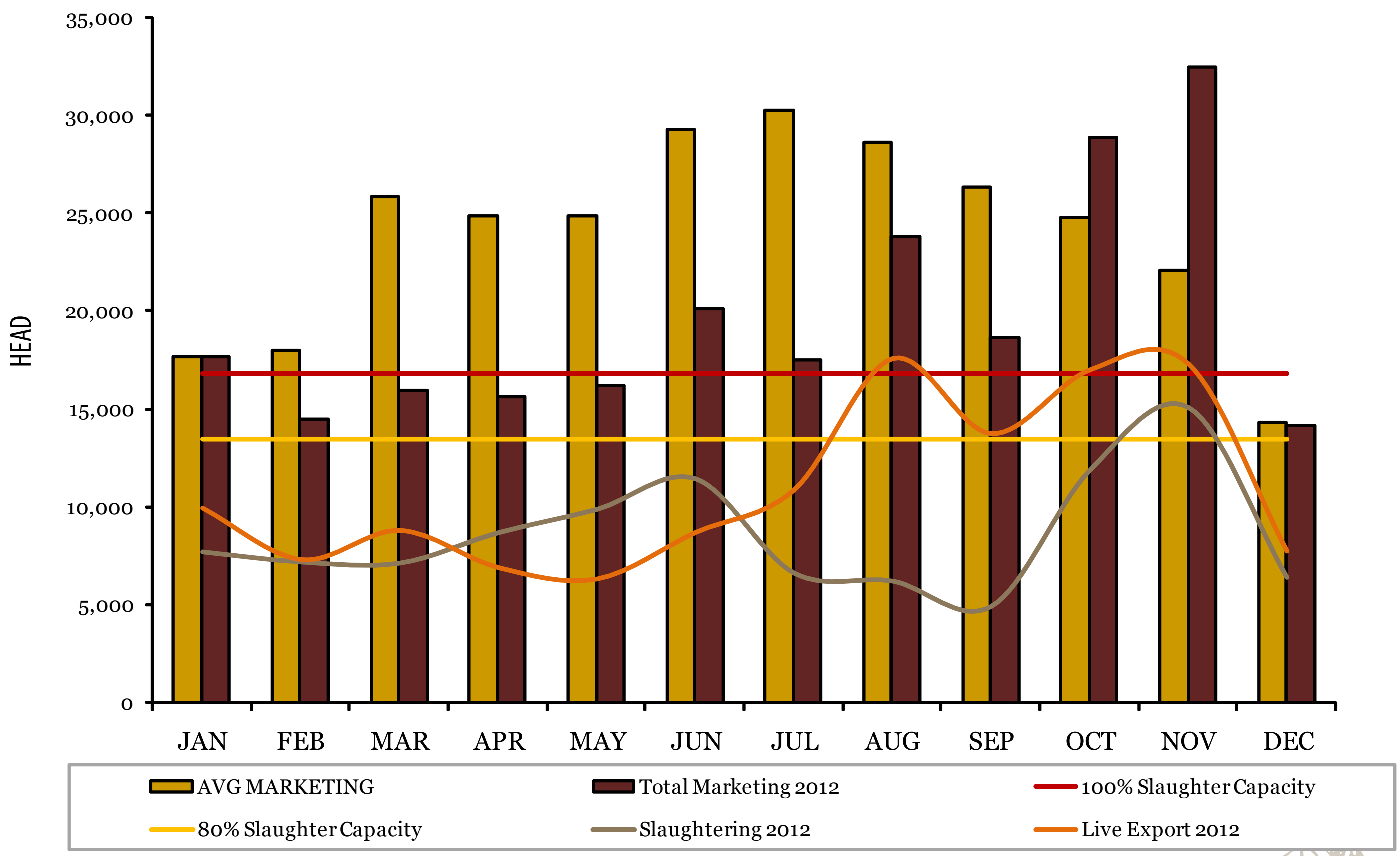
Marketing of cattle

The total marketing of cattle by the end of 2012 stood at a level of266 667 livestock units. The overall performance of cattle marketing declined by 25.2 percent when compared to cattle marketed by the end of 2011, which stood at the level of 356 561 livestock units.

Slaughtering of Cattle at Export abattoirs

Namibia's only EU approved export abattoirs, Meatco (Windhoek &Okahandja plants) and Witvlei reported a total slaughter figure of 102 980 livestock units by the end of 2012, which went down by 8.55% from a level of 112 602 livestock units as reported in the preceding year. Of the total cattle slaughtered, 92% were slaughtered at the two Meatco plants (Windhoek &Okahandja), and the average grades slaughtered were, 23.4% A-grade, 21.70% AB-grade, whereas the B and C grades accounted for up to 37.2% and 16.9%, respectively. The average carcass mass measured for the reporting period was 255.05 kg per carcass unit, a 1.51% increase from 2011 average carcass mass of 251.27kg.

5 YEAR AVERAGE MONTHLY CATTLE MARKETING

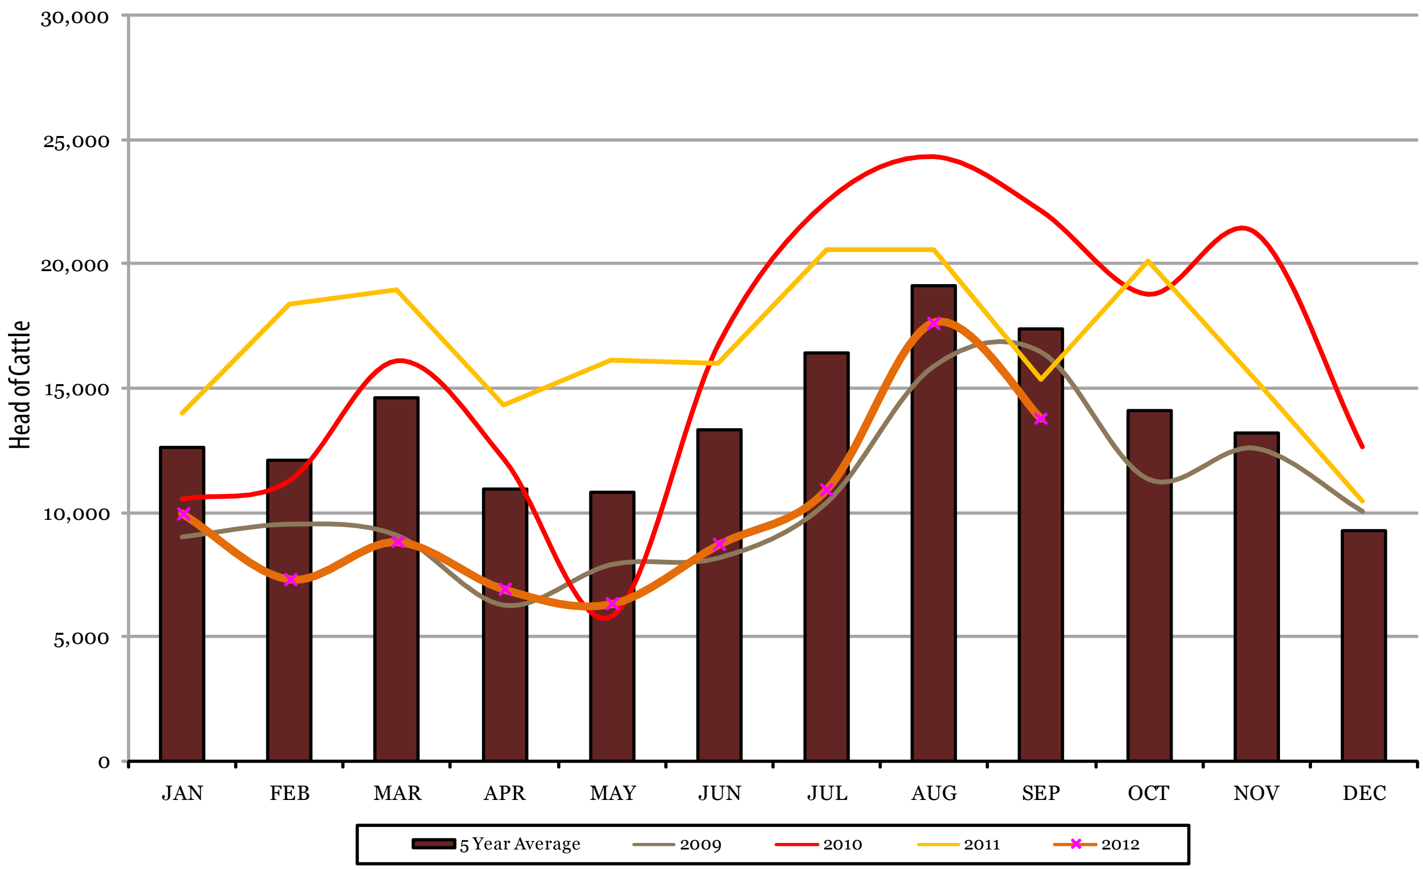


A total of 9 563 tons of chilled and frozen deboned cuts were exported to the EU and Norwegian market while a total of 7 163 tons were exported to African markets during the year 2012. When compared to total tons exported in 2011, a 5.8% decrease was observed when a total of 17 756 tons were exported (8 392 tons to EU/Norway & 9 364 tons to African markets).

Exports of live cattle

Exporting of cattle to South Africa decreased by 33.85% from 204 858 livestock units exported in 2011, to stand at 130 196 livestock units marketed in 2012.

PRODUCER PRICES FOR CATTLE AND BEEF



The average beef producer price by the end of 2012 stood at N$25.35/kg, while on livestock auctions, the weaner prices closed at N$17.72/kg. On the other hand, the prices of stores and slaughter cattle stood at N$15.73/kg and N$13.81/kg (live weight), respectively.

Export of Livestock to Angola

The table below depicts the quantity and type of livestock exported to Angola during the year 2012. The animals exported predominantly hail from the Northern Communal Areas, specifically in the Opuwo district. No sheep was exported to Angola which might be as a result of the small stock marketing scheme. From the total of 1703 cattle exported, approximately, 106 breeding cattle were exported to Angola. Estimates of 45 breeding animals from the Outapi area were sold at the annual Ondjiva Trade fair during 2012.

EXPORT OF LIVESTOCK TO ANGOLAN MARKET			
Year	Cattle	Sheep	Goats
2011	3214	494	18,418
2012	1703	0	20,725

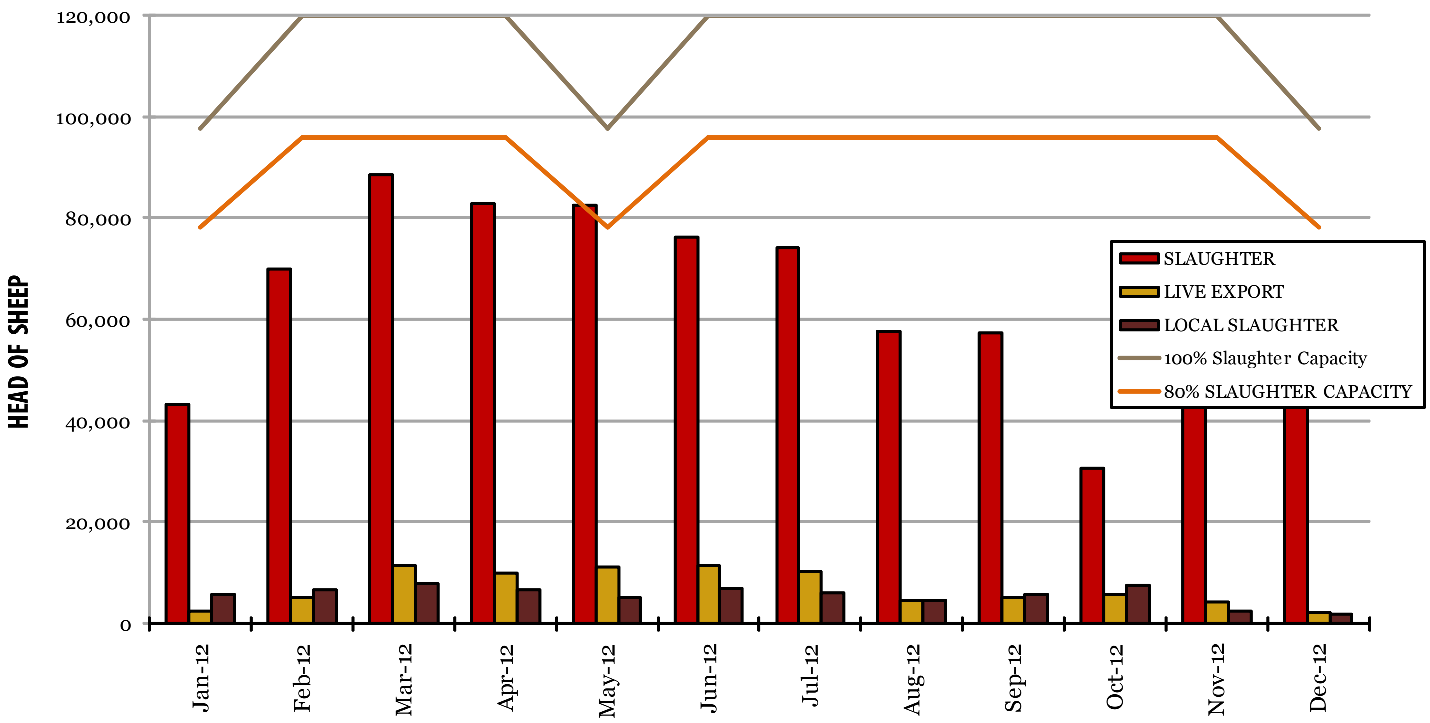
Small Stock Sector

Total marketing of small stock by the end of 2012 stood at 1 159 481 livestock units. This indicates a 2.8% increase from 2011 small stock marketed which was 1 127 516 livestock units.

Slaughtering of sheep at EU/RSA approved abattoirs

A total of 768 522 sheep were slaughtered by the end of 2012, a 3.44% increase in comparison to the corresponding year when a total of 742 986 livestock units were slaughtered.

TOTAL SLAUGHTERING VS LIVE EXPORT



Exports of small stock to South Africa

During the reporting period, exports of small stock decreased slightly by 1.38% in comparison with livestock units exported in 2011. A total of 335 373 livestock units were exported to South Africa, going down from a level of 337 971 livestock units exported in 2011 over the same period. In 2012, the total small stock exported comprised of 229 171 goats and 85 477 sheep, while in 2011, there was 251 777 goats and 67 282 sheep exported.

Producer prices for small stock

The average sheep producer's price by the closing calendar of 2012 was N$28.62/kg, which depicts a 9.72% decrease from N$31.71/kg during the corresponding year. On the livestock auctions, lamb traded on average for N$17.41/kg (live weight), which is a 4.6% decrease from N$18.25/kg the previous year. On the other hand, goats on average per head fetched; N$495.79 for small goat (32kg), N$669.40 for medium goats (32-45kg) and N$907.43 for large goats (45kg<).

Conclusion

The cattle industry performed poorly both in marketing and prices during the year 2012 in comparison to cattle marketed in 2011. The poor performance was affected by the decline in both, live exports as well as the slaughtering. The main attributing factor to the decline is the lower weaner prices offered by the South African abattoirs at auction during 2012 as opposed to the higher weaner prices experienced in 2011. The decline in wearner prices is affected by the high production costs experienced by the South African feedlots as well as the decline in the demand of beef due to high beef prices in the market.

On the other hand, the overall performance of the small stock industry showed a positive trend when compared to the total livestock marketed in 2011. Slaughtering and exportation of sheep in 2012 improved when compared to the previous year. However, there is a significant decline in the total exports of goats to the South African market which could be as a result of a decline in the average prices offered per head at auctions.
