### **REPORT OF THE CHAIRPERSON OF THE MEAT BOARD OF NAMIBIA (2016-2017)**

Honourable Minister Mutorwa;

I am honoured to present the Report of the Chairperson of the Meat Board of Namibia (MBN) for the financial year 2016/2017 ending 28 February 2017.

Activities of the Board will be highlighted according to the Strategic Focus Areas of the Board.

#### STRATEGIC FOCUS AREA: ENSURING A SUSTAINABLE ORGANISATION

A new MBN Board was appointed by the Honourable Minister of Agriculture, Water and Forestry to govern the activities of the meat industry for the next three years as per the Meat Industry Act, 1981 (Act no 12 of 1981) ("Act") during February 2017.

Front: Dr Archie Norval (Vice Chairperson); Patricia Gurubes (Chairperson of Board), Paul Strydom (General Manager) Middle: Floris van Niekerk; Rosa Katjivena; Dr Lucia Ndamonako Marius; Mary Kalngula-Ndakalako; Yvonne Howaes; Estelle Pienaar; Sikunawa Negumbo;

Back; Alfred Namayabona Chilinda; Ramana Mutjavikua; Johannes Balzar; Julene Meyer.

Since only three members were reappointed to the Board, management engaged in an induction program to familiarise new Board members with the Act, MBN Strategic Plan and operations of industry role players. The development and preparation of Board members is addressed with every Board meeting.

I herewith take the opportunity to thank the previous Board members for their guidance, support and contributions the past three years and wish all the new board members all the best during their term of office.

The MBN is financed by mainly producer levies and finances of the Board are always properly budgeted for and prudently expended. Annual expenses of the MBN are brought in line with income despite availability of enough reserves to exceed annual income. Congratulations to Management and staff that apply proper financial discipline and receive year-on-year unqualified reports by the Auditor-General Office.

#### STRATEGIC FOCUS AREA: STRENGTHEN STAKEHOLDER RELATIONS

The MBN developed and approved a Stakeholder Communication Strategy which aims to increase awareness of the activities of the MBN and potential benefits to the meat industry. The strategy is continuously updated to include functions to assist with establishing the MBN as a strategic partner and custodian of the meat industry in Namibia. Some of the activities that were implemented included:

- Annual visits to Regional Agricultural Unions and Farmers' Information Days to inform on "What the MBN is doing and the role and functions of the MBN"
- Distribution of information to stakeholders and role players. The role and functions of the MBN and trade information were reviewed and redesigned to conform to the new corporate image and branding strategy "WE LOVE NAMIBIA'S MEAT" approved by the Board.
- The MBN attended the various Trade Fairs during the latter part of 2016 at Ongwediva, Okakarara and Windhoek Agricultural Show. The purpose of attending the shows is to highlight the Roles and Functions of the Meat Board of Namibia, Registration of Producers and Stock Brands, Queries on the Meat and Livestock Sector, explaining FAN Meat and NamLITS procedures and advising on Import and Export regulations.

One of the main objectives of the MBN's Strategic Plan is to have sound relations with the Ministry of Agriculture, Water and Forestry, as well as the other role players. To improve these relations, the MBN on several occasions advised the Honourable Minister to institute periodic meetings with industry. Strengthening scheduled consultations between Government and representative role players is of crucial importance to behold the economic growth of the Namibian meat industry.

The MBN, representing the major role players in the Namibian livestock and meat industry on Board level, is structured to consult wider with different role players through its industry committees, especially those not represented at Board level. Coping with a shortage of specialised skills, especially in Human Resources and accountancy at Board level, the MBN Board appointed experts to its Human Resource and Audit and Risk Committees to assist with decision making.

Namibia hosted the 22nd Conference of the OIE Regional Commission for Africa in Swakopmund from 20-24 February 2017. The OIE member countries constitute five regions of which Africa is the largest with 54 member countries. The MBN made a presentation indicating the following dilemmas being faced by trading internationally:

- Member countries using OIE standards as an unfair barrier to trade to protect local markets;
- Member countries of equivalent status requiring higher standards for import and higher standards than what are applied nationally by the importing country itself;
- Member countries not accepting OIE recommendations, for example the difficulty Namibia experiences with trade in meat from the FMD infected zone treated in accordance with OIE recommendations, however unsuccessful in obtaining a market to both FMD free and FMD infected countries;

Meat Board of Namibia

- Member countries including OIE standards for trade not relevant to the commodity in question, for example requiring Lumpy skin disease freedom for trade in beef;
- Member countries not acknowledging official freedom, for example difficulty in obtaining bone-in lamb exports from the Namibian FMD free zone;
- Extreme high cost in compliance to standards implemented by countries, for example Bovine Tuberculosis testing requirements for export of weaners to countries infected with Bovine Tuberculosis
- Extreme high cost for obtaining self-declared disease freedom from example Bovine Tuberculosis in accordance with OIE recommendations. The country has last reported Bovine Tuberculosis in 1995, which is 22 years ago. An option would be to request the Scientific Commission to reconsider these stringent requirements for obtaining self-declared freedom from bovine tuberculosis.

During the year under review the MBN received several high-level visits. The Nigerian Defence College visited the MBN to explore the reasons for Namibia's successes in terms of agricultural production and meat exports to different lucrative markets across the world. The delegation was led by high level delegates with the focus on strategic planning in terms of national development and to learn from Namibia's achievements.

In December 2016, the MBN received members of the Inter-Governmental Authority on Development (IGAD). IGAD expressed the wish to learn more about Namibia's highly successful Livestock Identification and Traceability System (NamLITS) and the collaboration between the MBN and the Directorate Veterinary Services. The Stock Brand office, Ear Tag office and NamLITS helpdesk of the MBN gave demonstrations during a tour of the FAN Meat office at the MBN Head Office in Windhoek.

A delegation of British parliamentarians visited Namibia to inter alia obtain information about trade between the two countries. Currently Namibia exports agricultural products to the United Kingdom under the EPA. According to the British parliamentarians, negotiations will have to take place about the future of trade between the two countries as BREXIT comes to an end.

#### STRATEGIC FOCUS AREA: MEAT MARKET ACCESS MAINTENANCE AND DIVERSIFICATION

The South African Directorate of Animal Health announced new conditions for the importation of livestock from Botswana, Lesotho, Namibia and Swaziland which were implemented on 1 July 2016. The MBN committed itself to assist the Directorate of Veterinary Services to ease the export of livestock and facilitated various discussions between the DVS and role players.

The MBN's relationship with the South African Red Meat Industry Forum and the South African Feedlot Association was instrumental in smoothing trade given the South African Veterinary Services' revised extraordinary import conditions. Amongst others, the new import measures require the individual identification of small stock and testing for certain diseases. To assist the industry with the export of livestock the MBN availed funds to the Central Veterinary Laboratory for Brucella and Salmonella testing and conducting a refresher training course for 23 veterinary officials on the testing of Bovine Tuberculosis for the individual testing of cattle exported to South Africa.

As the Directorate of Veterinary Services decided to implement a double ear tag system like that used in cattle in Namibia on sheep and goats, the MBN was authorized by DVS to purchase and distribute both the cattle as well as small stock ear tags to producers/ exporters. The first consignment was subsidised by the MBN and sold to producers at cost.

The MBN also assisted the industry with respect to the:

- Commissioning of studies to find alternative goat markets World goat and goat meat markets are available, but would result in producers receiving lower prices for goats;
- Irrigated pasture and natural pasture finishing of cattle in the Zambezi Feedlots are not financially viable in Namibia. A
  viable option may be the finishing of cattle at Green Scheme facilities;

 Administration of the Norway Beef quota 2017 - The Minister of Industrialisation, Trade and SME Development allocated the Norway Beef quota 2017 of 1600 tons to Meatco (1400 tons) and Brukkaros Meat Processors (Pty) Ltd (200 tons).

Given the diminishing sheep sector and various requests for the abolishment of the Sheep Marketing Scheme, the Honourable Minister of Agriculture, Water and Forestry requested the sheep sector under the chairpersonship of the MBN, to present a proposal on a Long-term Strategy for the Marketing of Sheep in Namibia. The sheep sector met various times to duly consider the realities of sheep marketing in Namibia, the financial viability of both the abattoir and producer sectors and (a) the Growth at Home Strategy, (b) the Export Levy Act and (c) Republic of South Africa Government Notice No 40060 (Revised Import Requirements for Cattle, Sheep and Goats). The submission was presented to the Minister on 7 November 2016 for a recommendation to Cabinet.

The MBN accompanied the Namibian Delegation to the 2016 General Assembly of the World Organisation for Animal Health (OIE) in Paris, France. Namibia obtained official recognition of Bovine Lung Sickness (CBPP) freedom for areas south of the VCF and obtained negligible risk for BSE, thereby becoming the first African country to obtain such status. The MBN congratulates the Directorate

Veterinary Service for ensuring that Namibia's veterinary health status is of such a nature that the country could achieve advantageous disease status. The maintenance of Namibia's free zones is of utmost important to the OIE and such maintenance will be strictly observed by the OIE.

The concept "Commodity Based Trade" (CBT) offers an opportunity to trade beef under certain quality management systems without jeopardising the risk of the importing country and at the same time improving the livelihood of communities residing north of the Veterinary Cordon Fence. At a workshop arranged by the MBN early November 2016, it was evident that Commodity Based Trade provides an opportunity and solution to the marketing of beef from areas where Foot and Mouth Disease is endemic such as the Zambezi region. Commodity Based Trade provides for a risk based beef value chain whereby each step in the value chain reduces the risk for a possible outbreak of Foot and Mouth Disease by the introduction of chilled and frozen beef into areas free from the disease. Commodity Based Trade is applied with huge success for moving beef from the Botswana Meat Commission, Maun abattoir located in a red zone to the country's green zone.

The MBN is concerned about the lack of formal cattle markets to producers north of the veterinary cordon fence. Cattle producers north of the veterinary cordon fence currently have no significant market for their cattle due to the outbreak of Foot-and-Mouth Disease (FMD) in the area, as well as the withdrawal of Meatco from the export abattoirs at

From left to right: Dr Anja Boshoff (Manager Meat Standards Meat Board), Hon. Annah Shiweda (Deputy Minister of Agriculture), Dr Adrianatus Maseke (Chief Veterinary Officer Namibia), Dr Juliet Kabajani (Chief Veterinarian Diagnostic Services)

Oshakati and Katima Mulilo, while the local abattoirs at Rundu, Eenhana, Outapi and Opuwa are not yet in operation.

The lifting of the FMD outbreak measures necessitated the Minister to make certain recommendations to locate markets for the producers' cattle and beef. The MBN was requested to manage the former quarantine farm Omutambo Maowe to produce oxen, as well as to investigate the financial feasibility of the erection of a processing plant in Bukalo, Zambezi. Nevertheless, the MBN continued to administer the Livestock Producer Forum Northern Communal Areas Farmers Mentorship Program to assist producers to produce cattle aligned with market requirements. To enhance cooperation between the MBN and DAPEES, the MBN financed refresher courses for DAPEES staff to strengthen and improve livestock extension services by extension staff. A total of 56 agricultural, animal health technicians and livestock scientific officers received training.

One of the MBN's functional pillars is the identification of and support to exporters with new market requirements. The MBN as such does not trade in products such as livestock and/or meat and can thus not provide a market itself. The MBN mainly focuses on the identification of export markets since 80% of Namibia's meat is exported.

Further areas where the MBN is involved include:

- Negotiations to get access to the South African market;
- Identifying possible markets like the USA and Hong Kong; and
- Bone-in lamb exports to the EU.

Of importance is that Namibia gained access to the United States of America market after a period of approximately 12 years of negotiations to export deboned beef to the USA. Namibia is the first country in Africa to gain access to the USA market. This new market could assist Namibian export abattoirs becoming more competitive.

The MBN would like to thank all stakeholders involved with the negotiations and would like to congratulate the DVS and Meatco on this achievement.

#### STRATEGIC FOCUS AREA: REGULATORY CONTROL OF STANDARDS

One of the MBN's strategic focus areas is the implementation of current standards and quality assurance improvements on farm and abattoir level. Abattoirs are registered annually by the Meat Standards division. Significant progress was made with inspection at local abattoirs delivering to large retail outlets and non-compliance was addressed and monitored. Abattoirs which did not respond to the re-registration requests was approached by the Law Enforcement division.

The FAN Meat division implemented a Quality Management System, which is ISO 9001:2008 accredited, to assist the industry in the adoption and implementation of International Welfare Standards and credible farm inspections through training facilitation and to develop a strong brand in export markets. FAN Meat was successful in the ISO audit on its Quality Management System during November 2016. The audit confirmed that the ISO standards are effectively implemented by this division. The implementation of the ISO standards, which is an internationally acknowledged management system, ensures that FAN Meat succeeds in its purpose to give consumers assurance regarding the traceability and safety of Namibian meat.

The MBN also audited forty farms against the FAN Meat and Woolworths standards during the year under review. These audits were executed in collaboration with officials from DVS. The first round of export abattoir inspections has been finalised and deviations that were found have been submitted to the management of Woolworths. Woolworths' standards require that export abattoirs are audited twice a year.

The Namibian meat industry applies the South African Classification system due to the importance of the South African market and Namibia would find it difficult to pursue its own classification system in this market. The South African Meat Industry Company (SAMIC) is an independent company conducting carcass classification audits in South Africa and annually audits the MBN to ensure that Namibia complies with the South African Classification Standards as Namibia exports many carcasses to South Africa per year. SAMIC also conducted annual audits at the export abattoirs in Namibia and indicated that it was overall impressed with the high standards applied by the MBN's Meat Classification Services. The MBN is the only institution that renders Classification Services in Namibia.

The annual Red Meat Abattoir Association conference was held in Stellenbosch, South Africa on 8-10 June 2016 and was attended by the MBN which made valuable inputs to the South African Classification system. The South African industry conducted research "SA's Meat Classification Research Study and possible changes to the Meat Classification System".

To promote the buying of locally produced meat products, the MBN developed and implemented a "Local Buy" campaign. This campaign, as part of the MBN Seal of Quality program, uses posters as well as Seal of Quality stickers on meat trays to advertise outlets that comply with certified meat hygiene standards that are regularly audited by the MBN. The Seal of Quality program is a hygiene certification programme developed by the MBN and is aimed at ensuring the purchase of safe and wholesome red meat and red meat products. The Seal of Quality strives to support the Namibian red meat industry by stimulating trust in hygiene and quality of red meat and red meat products sold at participating establishments.

During the annual Tourism Expo held in 18 - 21 May 2016, the MBN introduced consumers to the Namibian Classification system and its relevance for the consumer. Products that originate from the members of the Seal of Quality program were displayed to give them exposure to the public.

In conclusion, Honourable Minister, I thank you for the opportunity to serve the Namibian livestock and meat industry for another term. All decisions of the MBN are measured against the contribution it will make to the betterment of the gross domestic product of the livestock and meat sector. It is my appeal that as the Namibian meat industry renders such a huge contribution to the Namibian economy, it be allowed to manage itself to restore growth in this sector.

To the role players so diligently trying under difficult economic trading circumstances to maximise Namibia's livestock and meat return to the benefit of the country, thank you for your efforts. To the management and staff, your contributions are valued, please continue rendering your endless efforts to the Namibian livestock and meat industry.

### **MARKETING REPORT 2016**

#### **CATTLE SECTOR: PRODUCTION AND MARKETING**

A total number of 295 217 cattle have been marketed between the months From January to December 2016. The live exports to South Africa accounted for 56% of the total market share with 165 927 cattle exported. The number of cattle slaughtered at the export abattoirs accounted for 35% with 103 097 whilst the local abattoirs slaughter a total number of 26 193, equating to 9% of the total market share.

#### FIGURE 1: 5- YEAR MONTHLY AVERAGE CATTLE MARKETING CYCLE

Figure 1 shows the monthly marketing information which clearly indicates the reduction in the number of cattle marketed mostly between the months June and July as a result of the RSA import conditions implemented in July 2016. Between the months June and July, the number of live cattle exports reduced from 31 837 to only 2 cattle units. A gradual increase in the live exports was however observed from September to November 2016 respectively.

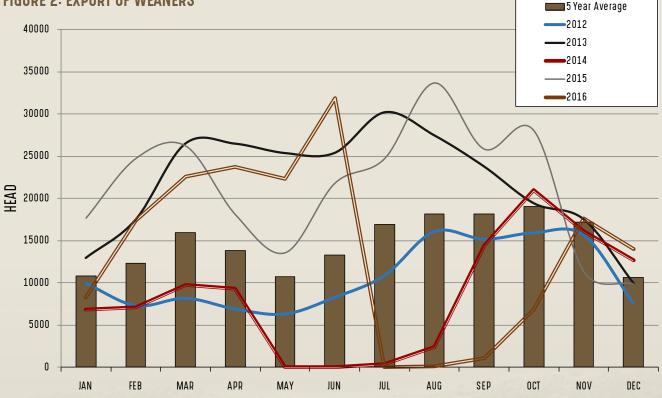

Comparing the number of cattle marketed in 2015 and 2016, a percentage decrease of 30.3% was observed representing a decline from 423 491 cattle marketed in 2015 to 295 217 in 2016. The difference between the cattle marketed in 2015 and 2016 can be attributed to the steep decline in live exportation of cattle to South Africa due the veterinary import conditions implemented on the 1 July 2016.

A combined total number of 129 290 cattle units were slaughtered at the A, B and C class abattoirs between the months January to December 2016 of which the cattle that have been slaughtered at the export abattoirs made up 35% of local slaughtering whilst those slaughtered at the B & C class abattoirs make up 9%.

Figure 1 above shows a decrease in the number of cattle slaughtered between the months September to December 2016, reducing to only 2424 cattle being slaughtered in December .The limited availability of quality slaughter animals at that time of the year is the contributing factor to the reduction

#### LIVE EXPORTS OF WEANERS

#### FIGURE 2: EXPORT OF WEANERS

Comparing year on year, live exports of cattle to South Africa reduced from 281 965 in 2015 to 165 927 cattle units in 2016 showing a decrease of 30.1% between the two years. This significant reduction between 2015 and 2016 January to December, can be solely attributed to the new RSA import conditions implemented on the 1 July 2016 which therefore resulted in a significant decrease of 98.6% in the live exportation of weaners in 2016. The resumption of exports to South Africa however resulted into an increase in the number exported as the year progressed.

The South African Import regulations therefore also had a great impact on the price offered to producers as they were forced to accept the low prices on offer. Prices reduced from N\$16.68 to N\$11.30 respectively between the months August to October 2016. The producers bargaining power also reduced as a result of the new conditions thus negatively impacting their potential income that they would otherwise obtain under different conditions. As better export conditions were obtained , slight increases in the prices were observed mostly between the months October -December 2016.

Overall an average decrease of N\$ 1.31 in the weaner auction price between the year 2016 and 2015 was observed, reducing from N\$ 18.04/kg in 2015 to N\$ 16.73/kg in 2016. Due to the volatility of the prices, the price differences are a result of the market forces mainly the supply and demand of Namibian weaners in South Africa.

#### SHEEP SECTOR: PRODUCTION AND MARKETING

Figure 3 below shows the number of sheep that have been marketed on a monthly basis between the months January to December 2016. A total of 680 843 sheep were marketed, of which 321 413 sheep were slaughtered at the export abattoirs, which accounts for 47.2% of the total number marketed. Live exports amounted to 290 389 whilst the sheep that were slaughtered at the B&C class abattoirs amounted to 68 741. Live exports accounted for 42.6% of the total number of sheep marketed and 10% of the market share is attributed to those sheep that were slaughtered at the B&C class abattoirs.

A decreasing trend is witnessed between the months August -December 2016 in the number of sheep that were slaughtered at the export abattoirs and those slaughtered at the B&C Class abattoirs. By December 2016 only 10 512 sheep were slaughtered between all three export abattoirs. These decreasing numbers were attributed to the unavailability of sheep to slaughter.

#### FIGURE 3: SHEEP SLAUGHTERING VERSUS LIVE EXPORTS 2016

Of the total number of sheep exported live, 280 179 sheep were exported under the sheep quota system, whereby for each one sheep slaughtered at the export abattoirs, a producer can export one. This equates to 96.4% of the total number of sheep exported live whilst the sheep exported under the "too lean too small" scheme only amounted to 3.23% of the live exports.

Comparing to the last 5 years , the least number of sheep were marketed in 2016 amounting to only 680 843. This is a reduction from 2015 respectively, whereby 961 180 sheep were marketed over the same reporting period. This indicates a decrease of 29.2% between the two years. Although both 2015 and 2016 were drought years the decrease in the total sheep marketed in 2016 compared to 2015 can be attributed to specifically to the decrease in the number of sheep exported between the two years where 437 229 live sheep were exported in 2015 and only 290 383 were exported live in 2016. This reduction is a result of the RSA import conditions which reduced the number of exports in June 2016 from 56 881 to 7 588 live exports in July 2016.

#### **A2 SHEEP PRICES**

Figure 4 gives an overview of the A2 sheep price fluctuations between the Namibian prices with that of the RMAA and the Northern Cape prices. An increase in the Namibian and the Namibia super price is observed between 45 and 52 specifically. Collectively a decrease in the price difference between mostly the Namibian and that of the Northern Cape was obtained decreasing to a difference of N\$ 0.75/kg in week 46 the lowest obtained in the whole of 2016.

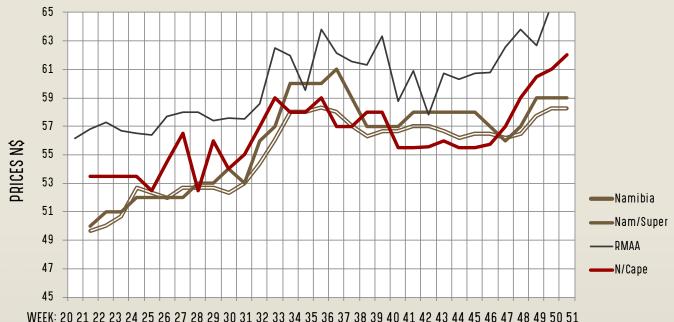

FIGURE 4: REPORTED CARCASS PRICES BY EXPORT ABATTOIRS (A2-GRADE)

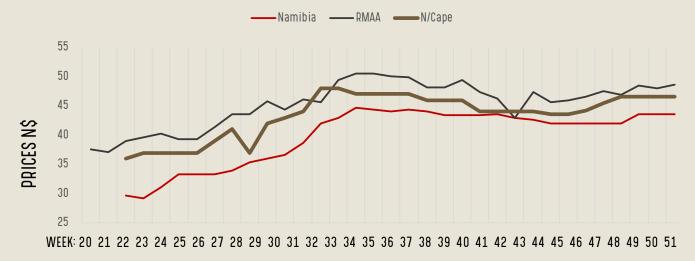

There has therefore been a general decrease in the price difference between that of Namibia and the Northern Cape where most of the Namibian sheep are destined for. The average price difference for A2 sheep in 2016 was N\$ 2.65/kg. A lower price difference puts Namibian abattoirs at an advantage as they are now in a position to offer almost equivalent prices to producers.

The price of sheep skins in South Africa has a direct impact on the financial position and therefore price that is offered by the Namibian abattoirs. The lower the price sheep skins in RSA toe worse off is it for these abattoirs and vice versa. This therefore compromises the entire competitiveness of the industry.

#### **C2 SHEEP**

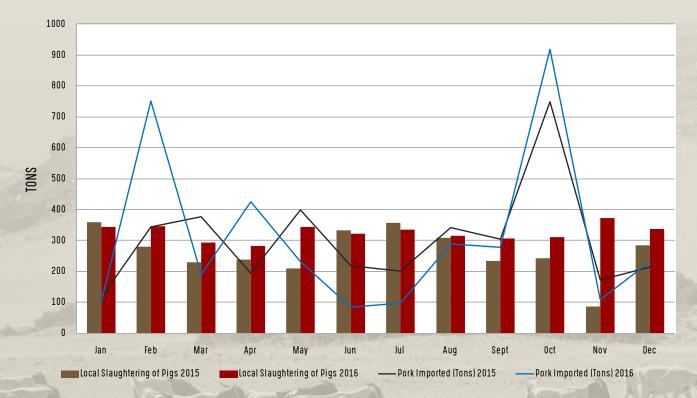

Figure 5 show the C2 sheep price fluctuations and differences between the Namibian prices with that of the RMAA and the Northern Cape prices. An increase in the Namibian price is observed between weeks 48 to week 52 moving from N\$42.00/kg to N\$ 43.50/kg. An average price difference between the Namibian and the Northern Cape prices for 2016 stood at N\$ 3.40/kg whilst the difference in 2015 was observed at N\$ 2.64/kg respectively.

#### FIGURE 5: REPORTED CARCASS PRICES BY EXPORT ABATTOIRS (C2-GRADE)

#### THE PORK SECTOR: PRODUCTION AND MARKETING

The total tonnage of pork imported from January to December 2016 stood at 3 709 tons. This represents an increase of 2.34% from 3 626 tons in 2015 to 3 709 in 2016 over the same reporting period. Local slaughtering between January to December 2016 stood at 3 907 tons of pork, whilst between Januarys to December 2015 a total number of 3 162 tons of pork supplied by the local market. This shows a percentage increase of 19.07% between the two years. The increase in the local pork slaughtering can be attributed to an increase in pork producers in the country operating at a smaller scale. Pork production is a high capital intensive operation and therefore this could be the reason to the slow growth in the sector.

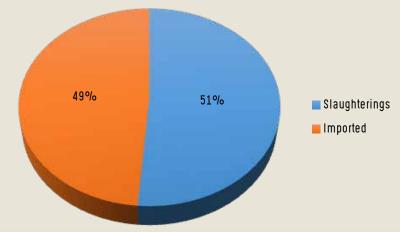

#### FIGURE 6: PORK SLAUGHTERING VERSUS IMPORTS 2015 AND 2016 IN TONS JANUARY TO DECEMBER 2016

### **PORK MARKET SHARE**

The Pork imports in 2016 made up 49% of the total market share whilst the local slaughtering accounted for 51% of the total market share. Although Namibia is a net importer of pork, the Pork Market Share Promotion Scheme aims to create a level playing field by ensuring that importers purchase local pork products that are under the scheme thus controlling the potential surge in cheap imported pork products into the country.

#### CONCLUSION

It is evident that import and export conditions have an impact on the marketing and the price of the cattle as is the case for Namibia in 2016. An overall decrease in the total marketing of cattle 2016 compared to 2015 is observed, with a percentage decrease in marketing of 30.3%. This is due to the significant reduction in the live exportation of weaners. The stringent regulations therefore also had an impact on the price of weaners at auctions. Towards the last three months of 2016, a gradual increase in the weaner prices was realized thus showing a positive incline.

The decrease in the total number of sheep marketed in 2016 in comparison to the sheep marketed in 2015 can be attributed to mostly the RSA import conditions implemented from the 1 July 2016 which place restrictions on the live exports. A 29.2% decrease between the two years shows a significant difference despite the similar climatic conditions.

A reduction in the average price difference for both the A2 and C2 is observed mostly between the weeks 45 and 52 where as for the year 2016 as a whole, an average A2 price difference of N\$ 2.65 and an average difference of N\$3.40 for the C2 sheep between the Namibian and Northern Cape prices was realised. Given the lower price differences, an expected increase in local slaughtering was anticipated however producers continued to export their sheep.

There is therefore a need to ensure that the sheep sector is not compromised and disadvantaged, given the various challenges experienced such as the climatic conditions, the price of sheep skins and low slaughtering numbers.

**REPUBLIC OF NAMIBIA** 

**REPORT OF THE AUDITOR-GENERAL ON THE ACCOUNTS OF THE** 

### **MEAT BOARD**

FOR THE FINANCIAL YEAR ENDED 31 MARCH 2017

Published by authority Price (Vat excluded) N\$ 38.00 Report no: 2017/100

#### **REPUBLIC OF NAMIBIA**

#### TO THE HONOURABLE SPEAKER OF THE NATIONAL ASSEMBLY

I have the honour to submit herewith my report on the accounts of the Meat Board of Namibia for the financial year ended 31 March 2017 in terms of Article 127(2) of the Namibian Constitution. The report is transmitted to the Honourable Minister of Finance in terms of Section 27(1) of the State Finance Act, 1991 (Act 31 of 1991) to be laid upon the Table of the National Assembly in terms of Section 27(4) of the Act.

WINDHOEK, November 2017

JUNIAS ETUNA KANDJEKE AUDITOR-GENERAL

# 1. Report on the Financial Statements

### 1.1 INTRODUCTION

The accounts of the Meat Board (the Board) for the financial year ended 31 March 2017 are being reported on in accordance with the provisions set out in Section 16 (2) of the Meat Industry Act 1981, (Act 12 of 1981) as amended by Amendment Act 21 of 1992.

Figures in the report are rounded off to the nearest Namibia dollar and deficits are indicated in (brackets).

I certify that I have audited the accompanying financial statements of the Meat Board for the financial year ended 31 March 2017. These financial statements comprise of the following:

Annexure A:	Balance sheet;
Annexure B:	Income statement;
Annexure C:	Cash flow statement; and
Annexure D:	Notes to the financial statements.

The financial statements were submitted by the Accounting Officer to the Auditor-General in compliance with the Meat Industry Act, 1981 (Act 12 of 1981) as amended by Amendment Act 21 of 1992 after year end as required by the Act.

The financial statements notes to the financial statements and general information provided by the General Manager are attached as Annexure A - D.

### 2. MANAGEMENT RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the Meat Industry Act, 1981 (Act 12 of 1981) as amended by Amendment Act 21 of 1992 and relevant legislation and for such internal control as management determines it necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

# 3. AUDITOR'S RESPONSIBILITY

My responsibility is to express an opinion on these financial statements based on the audit. I conducted the audit in accordance with International Standards for Supreme Audit Institutions (ISSAIs). These standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

### **Powers and duties**

Section 25 (1) (c) of the State Finance Act 1991 provides that the Auditor-General should satisfy himself that:

- (a) All reasonable precautions have been taken to ensure that all monies due to the State are collected and that the laws relating to the collection of such monies have been complied with;
- (b) All reasonable precautions have been taken to safeguard the receipt, custody and issue of and accounting for the State's assets such as stores, equipment, securities and movable goods; and
- (c) The expenditure has taken place under proper authority and is supported by adequate vouchers or other proof.

In addition Section 26(1) (b) (iv) of the State Finance Act 1991 empowers the Auditor-General to investigate and report on the economy efficiency and effectiveness of the use of the State's resources.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error. In making those risk assessments the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management as well as evaluating the overall presentation of the financial statements

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for the audit opinion.

### 4. ACKNOWLEDGEMENT

The assistance and co-operation by the staff of the Board during the audit is appreciated.

# 5. KEY AUDIT FINDINGS

No key audit findings were observed during the audit.

### 6. UNQUALIFED AUDIT OPINION

The accounts of the Meat Board for the financial year ended 31 March 2017 were audited by me in terms of the provisions of Section 16 (2) of the of the Meat Industry Act 1981 (Act 12 of 1981) as amended by Amendment Act 21 of 1992.

In my opinion the financial statements present fairly in all material respects the financial position of the Meat Board of Namibia as at 31 March 2017.

WINDHOEK, November 2017

JUNIAS ETUNA KANDJEKE AUDITOR-GENERAL

# MEAT BOARD OF NAMIBIA Notes to the financial statements for the year ended 31 march

# 1. ACCOUNTING POLICIES

The annual financial statements have been prepared in accordance with Namibia Statement of General Accepted Accounting Practice - NACOO1: Financial Reporting for Small and Medium Sized Entities, using the historical cost convention.

The following are the principal accounting policies of the Board, which are consistent with those applied in prior years:

### **Revenue recognition**

Revenue comprises the gross invoiced value of sales in respect of trading operations and levies received, excluding Value Added Taxation.

Revenue from the sale of goods and services is recognized when the significant risks and rewards of ownership are transferred to the buyer.

# Property, plant and equipment

Land and buildings is considered as immovable property and accordingly not depreciated but tested for impairment annually.

The Board carries plant and equipment at historical cost less depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of assets.

Plant and equipment are depreciated as follows to reduce the book value to the residual value over the useful lives of the relevant assets:

- Furniture and equipment 10% reducing balance method
- Computer equipment 20% straight-line method
- Motor vehicles 33% straight line method
- Show equipment 20% straight line method

The estimated useful lives, residual values and depreciation methods are reviewed at each year-end and the effect of changes in estimated accounted for on a prospective basis. The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in income.

### Impairment of assets

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. An impairment loss is recognized for the amount by which the carrying amount of the asset exceeds it recoverable amount, which is the higher of an asset's net selling price and value in use. For the purpose of assessing impairment, assets are grouped at the lowest level for which there is separately identifiable cash flows.

### **Financial instruments**

Financial instruments recognized on the balance sheet include cash and cash equivalents, investments, trade receivables and trade payables.

### Cash and cash equivalents

For the purposes of the cash flow statement cash and cash equivalents comprise cash on hand, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less, and bank overdrafts. In the balance sheet, bank overdrafts are separately disclosed in current liabilities.

#### Investments

Investments consist of investments at financial institutions and have maturity dates of higher than three (3) months after financial year-end. Investments are initially recognized at cost but subsequently carried at amortized cost.

### Trade receivables

Trade receivables are carried at original invoice amount less provision made for impairment of these receivables. Such provision for impairment of trade receivables is established if there is objective evidence that the Board will not be able to collect all amounts due according to the original terms of receivables.

### **Trade payables**

Trade payables are carried at the fair value of the consideration to be paid in future for goods or services that have been received or supplied and invoiced or formally agreed with the supplier.

# Provisions

Provisions are recognized when:

- The Board has a present legal or constructive obligation as a result of past event; and
- It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- A reliable estimate of the amount of the obligation can be made.

### Inventory

Merchandise is valued at the lower of cost and net realized value. Cost is determined on the weighted average cost basis and includes transport and handling costs. Obsolete redundant and slow moving inventory is identified and written down to their estimated realizable values.

# MEAT BOARD OF NAMIBIA NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH (Continued)

### 1. ACCOUNTING POLICIES (Continued)

### **Interest expenses**

The Board recognizes interest and expenses in the income statement for all instruments measured at amortized cost using the effective interest method.

### **Computer software**

Computer software is expensed in the year it is incurred.

### **Employee benefits**

The Board recognized in full employees 'right to leave entitlement in respect of past service. Staff bonuses are accounted for in the year to which they relate.

### **Different funds**

### **Reserve fund**

The Reserve fund contains the accumulated reserves. In terms of Section 13(6) of the Meat Industry Act, this fund shall be utilized for various purposes as authorized by the Minister on recommendation of the Board from time to time.

# **Cattle Stabilization fund**

These are special account established in terms of Section 13(1) of the Meat Industry Act for the purpose of accruing special levies to be utilized for the promotion and development of markets for cattle and their products. The stabilization levies were suspended in 1994 the accumulated reserves were transferred to Reserve fund during 2016/2017 financial year.

# Animal Health fund

This fund was established during the 1994/1995 financial year with the objective of accruing a special health levy to be utilized for providing support to the DVS in case of a national emergency. This levy is based on General Levy which is 5% of the total levy received.

# Fan Meat fund

The Fan Meat fund was established for the implementation and maintenance of a National Quality Assurance and Traceability Scheme.

# 1. ACCOUNTING POLICIES (Continued)

### Stock Brands Registration fund

The Registrar of Stock Brands who is also the DVS, outsourced the administration of stock brands to the Meat Board. A stock brands registration fee was imposed and special account was opened for that purpose.

### NCA Voluntary Levy fund

The NCA fund was voluntary established on 1 July 2007 by producers in the south of the veterinary cordon fence with the objective to enhance market access to cattle in the NCA. A special levy was imposed and accrues to this fund for a period of 5 years. The levy was abolished on 30 May 2012.

### Ear Tag fund

The Ear Tag fund is for development and maintenance of an animal identification and traceability system, administration and distribution of official ear tags in Namibia.

### **MAWF** Project fund

The administration of the Government funds for the purpose of Improvement of animal health and marketing services in the NCA, Expansion of CVL, Construction of Veterinary Clinics and for Plant animal health and inspection systems at borders.

### **Drought Administration fund**

The administration of the Government fund for the establishment of an Drought Aid Information Management System for future drought implementation procedures the agreement was signed in 2006, the remaining balance was put in call account to gain interest till is fully utilized.

# 1. ACCOUNTING POLICIES (Continued)

# Feasibility Study of meat export to Angola & DRC fund

In May 2004 an amount of N\$2,416,700 was transferred from the Ministry to the Meat Board with an explicit instruction that the money will be used for the purpose of investigating and mounting a campaign towards facilitating the exploration of Namibian's meat to DRC and Angola and only on instructions to be provided under the signature of the Accounting Officer of the Ministry.

# **Finland Embassy Project fund**

The funding is meant for the Meat Market Diversification and Master plan for North Communal Areas project.

### MCA Caprivi Project fund

Funding from Millennium Challenge Corporation for the implementation of the MCA-N Livestock Marketing Efficiency (LMEF) project entitled 'Development of export opportunities for beef from the Caprivi.

### **Bukalo Meat Processing Plant fund**

Funds from Ministry of Agriculture Water and Forestry for the commissioning of Bukalo Processing Plant.
